

Cayuga Inlet Dredge Material:

Opportunities for Restoring Ecosystem Functions & Services

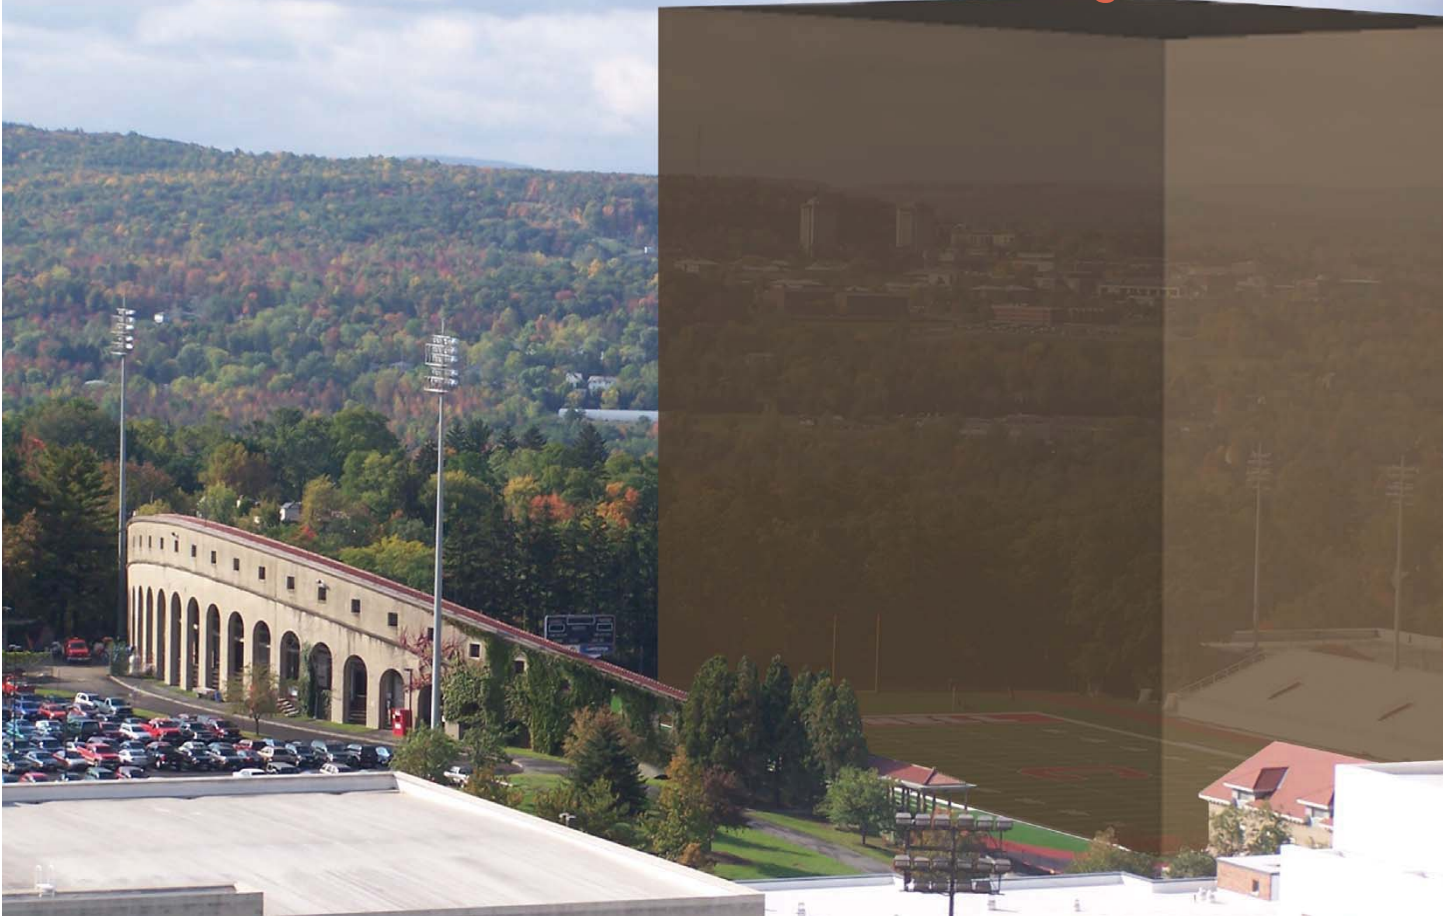

Thursday, December 1, 2011

7:00-9:00 PM

Tompkins County Public Library

Borg Warner Room

What Would You Do With This Much Dredged Material?

Students of Cornell University Restoration Ecology (Hort 4400) and Associate Professor Tom Whitlow will present their findings of local dredging needs and possibilities for the Cayuga Inlet. Come and learn about these potentials and their trip to see Poplar Island - An artificial island created from dredged materials in the Chesapeake Bay.
